

PRESTON INNOVATIONS NEW LEADS

Three sinkers for accurate casting

The popularity of using bread disks as well as brightly-coloured single hookbaits on commercial fisheries during cold-water conditions has seen a real resurgence in straight lead tactics. These three new sinkers from Preston are available in 0.5oz and 0.75oz non-toxic material, plus 1.1oz and 1.5oz lead weights.

The Flat Pear shape suits a wide range of situations with the tapered design providing a weight-forward set-up that is suitable for long-range casting. The flat profile means it will remain stable on sloping lakes or river beds.

The Bullet Cube profile is ideal for targeting the steep inclines that are often encountered when fishing up against island margins, while the aerodynamic

'bullet nose' aids casting distance as well as accuracy.

The final lead in the new trio is a Distance Bomb that really comes into play when long casting distances are required, although these leads do differ slightly from the standard

design as they have small flattened sides that help to reduce rolling on uneven bottoms. Supplied with two leads per header card, they are also all fitted with good-quality rolling swivels.

Price £ 1.99 - £2.50
