

PRESTON PC-R COMPETITION REELS

SMOOTH, TOUGH OPERATORS

The new PC-R Competition reels feature 3000, 4000, 5000 and 6000 sizes. All four have push-button, quick release aluminium spools with a top-quality front drag.

The engine room operates on nine stainless ball-bearings producing an incredibly smooth oscillation, that in turn delivers a superb parallel line lay.

With a steady gear ratio of 4.9:1 the larger reels are very well suited to feeder work, although the smaller 3000 size is slightly faster at 5.1:1 making it most anglers'

choice for float work.

Other nifty little features include an oversized metal line clip with soft plastic insert that is set low on the spool to provide added

confidence on the cast.

Completing the design is a sturdy stainless steel hollow bail-arm and a lightweight aluminium body with sealed construction that protects the internal mechanics and prolongs the life of the reel.

Price: RRP £120 all models
