

NEW GEAR

Looking at new tackle in the shops

Preston PC-R Competition reel

These smart new, 10 ball bearing competition reels are set to make a stir in 2012 thanks to big winding power, superior line lay and silky smooth front drag systems.

The good-looking reels feature a parallel line lay oscillation system, lightweight aluminium sealed body construction and two front drag, push-button alloy spools supplied as standard.

There are 3000, 4000, 5000 and 6000 size models available to cover all jobs from light float fishing to big river feeder work and light/medium specimen duties. All four different sized reels cost an identical £120 and spare spools for each size are £19.99 apiece.
